2nd International Metal Exhibition

Oct. 30th - Nov. 2nd, 2025

Science City Ground & Biswa Bangla Mela Prangan Kolkata, India

Concurrent with International Metal Conference (IMC)

www.metalexpoindia.com

THE OLDEST INSTITUTE OF ITS KIND IN ASIA **TAFCON** MGMI

Industry Support

Introduction

Metals have long been one of the primary drivers of industrialization, with key materials such as steel, iron, aluminium, copper, zinc, and nickel playing vital roles across various sectors. Among these, steel has consistently held a dominant position due to its versatility, strength, and wide range of applications. As both a raw material and an intermediary product, steel production and consumption are often viewed as reliable indicators of a nation's economic development.

India is the world's second-largest producer of crude Steel with production reaching 143.6 million tonnes (MT), while finished steel production stood at 138.5 MT in FY 2024, and also holds significant positions in aluminium and other non-ferrous metals. The industry is poised for further growth, driven by government initiatives like Make in India, National Steel Policy, Smart Cities, along with increasing infrastructure development and renewable energy projects.

The country has substantial reserves of iron ore, bauxite, manganese ore, and other minerals, supporting the metal industry and are fuelling growth in the metal sector. The Indian metal industry is modern, with state-of-the-art mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

Market Size - India

- In the past 10-12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.
- In FY24, the production of crude steel and finished steel stood at 143.6 MT and 138.5 MT, respectively.
- The metal fabrication market is expected to reach USD 5.13 billion by 2033, with a CAGR of 4.37% between 2025-2033.
- The metallurgical industry has attracted significant Foreign Direct Investment (FDI), with inflows of Rs. 1,10,062 crore (US\$18.06 billion) between April 2000-September 2024.
- As per the forecast by Indian rating agency CRISIL, India's steel demand is projected to grow by 8-9% in 2025.
- Steel Demand is expected to grow by 10% annually, while aluminium demand is projected to grow at a CAGR of 7.2% till 2030.
- Significant lithium reserves (~5.9 million tonnes) have been discovered in Jammu & Kashmir (2023), reducing future import dependence.
- India is set to open its first lithium mine in the Katghora region of Korba district, Chhattisgarh.
- India is promoting domestic exploration through initiatives like Khanij Bidesh India Ltd. (KABIL) to secure lithium and other critical minerals.
- The Indian lithium-ion battery market is experiencing substantial growth, with estimates projecting it to reach USD 9.56 billion by 2033. This growth is driven by the increasing adoption of electric vehicles (EVs) and the expansion of renewable energy storage systems.
- The annual production of steel is anticipated to exceed 300 million tonnes by 2030-31. By 2030-31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–2031. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

Road Ahead

The metal industry in India is poised for strong growth driven by rising demand in sectors like EVs, infrastructure, and renewable energy. Aluminium is gaining prominence for its lightweight and recyclable nature, especially in mobility and packaging. Copper demand is increasing due to electrification and power grid expansion, while zinc continues to be vital for galvanization in construction. Battery metals like lithium, cobalt, and nickel are critical for India's EV and energy storage ambitions, supported by recent domestic discoveries and global partnerships through KABIL. With the industry accounting for about 2% of the nation's GDP, India ranks as the world's second-largest producer of steel and is poised to overtake China as the world's second-largest consumer of steel. Both the industry and the nation's export manufacturing capacity have the potential to help India regain its favourable steel trade balance.

The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31. As per Indian Steel Association (ISA), steel demand will grow by 7.2% in 2019-20 and 2020-21.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railway sectors.

Government Initiatives

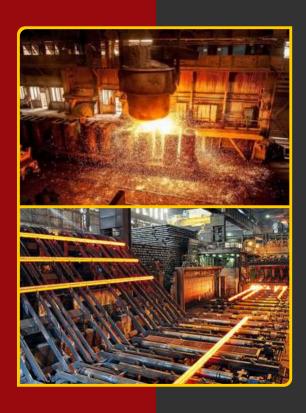

Some of the other recent Government initiatives in this sector are as follows:

- In January 2021, the Ministry of Steel, Government of India, signed a
 Memorandum of Cooperation (MoC) with the Ministry of Economy,
 Trade and Industry, Government of Japan, to boost the steel sector
 through joint activities under the framework of India—Japan Steel
 Dialogue.
- In June 2021, Minister of Steel & Petroleum & Natural Gas, Mr. Dharmendra Pradhan addressed the webinar on 'Making Eastern India a manufacturing hub with respect to metallurgical industries', organised by the Indian Institute of Metals. In 2020, 'Mission Purvodaya' was launched to accelerate the development of the eastern states of India (Odisha, Jharkhand, Chhattisgarh, West Bengal, and the northern part of Andhra Pradesh) through the establishment of an integrated steel hub in Kolkata, West Bengal. Eastern India has the potential to add >75% of the country's incremental steel capacity. It is expected that of the 300 MT capacity by 2030-31, >200 MT can come from this region alone.
- In July 2021, the Union Cabinet approved the production-linked incentive (PLI) scheme for specialty steel. The scheme is expected to attract investment worth ~Rs. 400 billion (US\$ 5.37 billion) and expand specialty steel capacity by 25 million tonnes (MT), to 42 MT in FY27, from 18 MT in Fy21.
- Under the Union Budget 2023-24, the government allocated Rs. 70.15 crore (US\$ 8.6 million) to the Ministry of Steel.
- The Union Cabinet, Government of India approved the National Steel Policy (NSP) 2017, as it intends to create a globally competitive steel industry in India. NSP 2017 envisage 300 million tonnes (MT) steelmaking capacity and 160 kgs per capita steel consumption by 2030-31.
- Critical Minerals Strategy 2023 onwards Focus on exploration and acquisition of critical minerals like lithium, nickel, cobalt, etc. Formation of Khanij Bidesh India Ltd. (KABIL) for overseas mineral asset acquisition.
- The Ministry of Steel is facilitating the setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs. 200 crore (US\$ 30 million).
- The Government of India raised import duty on most steel items twice, each time by 2.5% and imposed measures including anti-dumping and safeguard duties on iron and steel items.
- Green Steel Initiatives Promotes low-carbon steel production using hydrogen and electric arc furnaces. In line with India's Net Zero 2070 climate goal.
- 100% FDI allowed under the automatic route in mining and exploration of metal ores.
- The Indian government has several initiatives focused on the metals sector beyond steel these include the National Critical Mineral Mission with a significant outlay, exploration efforts for minerals like lithium and rare earth elements, and frameworks promoting the recycling of nonferrous metals.

Event Overview

- An ideal platform and environment for business networking with peers from Metal, Metallurgy and allied industries in an open and informative atmosphere, wherein you meet new and existing clients, generate new business, analyse your competitors all in one place, leading to further partnerships, ancillary services or new clients.
- Display and Launches of New Initiatives, Machinery, Products and Technologies.
- Large participation of leading manufacturers expected from India and Overseas.
- Participation of Corporates, State Governments, PSUs, SMEs, International Trade Bodies, Start-up organisations, etc.
- CEO's Forum with Major Industry Leaders.

Exhibiting Profile

- Steel & Metal Manufacturers & Suppliers
- Ferrous and Non-Ferrous Metal Producers
- Induction Furnaces and Heat Treatment
- Advance Materials Furnaces
- Steel Forming
- Heat Exchangers, Radiators and Cooling Towers
- Refractories & Products
- Metal Working Cutting, Shaping, Bending & Welding
- Forging, Casting Equipment and Accessories
- Metallurgical Equipment
- Research & Development Institutes & Laboratories

Participating Options

Built-Up Stall (in Air Conditioned Halls)

<u>Includes:</u> Octonorm Wall Panels, Synthetic Carpet, Fascia in English, 1 Spotlight per 3 sqm., One 5 amp socket per 12 sqm., 1 Counter, 3 Chairs, 1 Glass Top Round Table, Basic Single Phase Electricity for stand lighting and basic daily usages.

Bare Space (in Air Conditioned Halls)

Electricity Load to be ordered and paid extra

Sponsorship Packages (including Stall)

Post Show Report

The "ISME - International Steel and Metallurgy Exhibition" (concurrent with International Conference on Steel), organised by TAFCON, during November 6-9, 2023, was a grand success, as informed by VVIPs, Delegates, Exhibitors and Visitors.

"ISME 2023" was organised concurrent to the most prestigious 10th edition of "IME 2023 – the Premier International Exhibition for Mining, Equipment & Minerals" also organised by TAFCON. The synergy of these exhibitions were accepted and hailed by the Industry.

The events were inaugurated by "Chief Guest" Shri Amrit Lal Meena, IAS, Secretary, Ministry of Coal, Government of India in the presence of 'Guest of Honours' Ms. Rowan Ainsworth, Consul General, Australian Consulate General, Kolkata; the other eminent dignitaries present on the occasion were President MGMI Dr. B. Veera Reddy, Director (Technical) Coal India Ltd., Shri P.M. Prasad, CMD, Coal India Ltd., Shri Bhola Singh, CMD, Northern Coalfields Ltd., Shri Prasanna Kumar Motupalli, CMD, NLC India Limited, Shri Rajesh Nath, MD, VDMA.

ISME, proved to be an ideal platform for the global steel and metallurgy players, decision makers, bureaucrats, investors, industry leaders and other key stakeholders of the industry to congregate, display products, exchange technologies, new initiatives, negotiate for mutual business development and forge meaningful partnerships.

A conference, the theme "Minimising Carbon footprint in the Steel Industry was organized in association with Grant Thornton was very well attended. The Sessions, including a session on CEO's panel deliberation, had layed a strategic roadmap for paving the way for a greener, more sustainable future for the steel making sector; emerging technologies, sustainable practices, innovative approaches and importance of policies promoting trade, investment, skill development and job creation ensuring the steel industry's resilience and growth.

High level Trade Delegations and Country Level Group Participation from Germany, Australia, Czech Republic, Poland and many other countries were a part of these important events. The Exhibitions were participated by more than 446 exhibitors from Steel, Mining, Metallurgy and other allied sectors for displaying their equipment, products, technologies, innovative applications and research & development along with large participation from mineral rich states of India such as Gujarat, Jharkhand, West Bengal, etc.

ISME 2023 and the 10th IME 2023, were an unprecedented success as also by the remarks and comments given by VIPs, Delegates, Exhibitors and Visitors et all.

Kolkata - The City of Joy

Kolkata "The City of Joy" is the capital of the Indian State of West Bengal. It is also the commercial capital of East India, located on the east bank of the Hooghly River. The 'City of Joy' earned its nickname because of its unfettered enthusiasm for its culture, traditions, literature, history, food and more. The city has something for everyone from art and literature, to sports, food, shopping, history, architecture, religion, spiritualism and even politics. Kolkata is the perfect amalgamation of old-world charm and modern Experience. Every nook and corner of this city is filled with stories that are bound to mesmerise and charm you. There is more to Kolkata than one can ever imagine. The entire city of Kolkata is covered with the various means of transport, which simply means that you will not face any issues in commuting in this city.
